Design Idea: Conical suspended design with LED filament bulb projects clear and vivid circle light spots, which shows an outstanding retro feeling of the product.

Design Idea: By combining the profound electromagnetic wave elements of gamma rays with the spacing of bamboo and rattan, combined with LED filament bulb, a profound ray spot is projected.

Design Idea: The soft design of beta rays and the flexibility of bamboo and rattan make the product have the artistic sense of bamboo and rattan, and the light is softer.

Design Idea: The lamp body can be portable and inserted into the ground. The spiral change of the pattern and the confusing light and shadow symbolizes the freedom and change of the future.

Design Idea: The design is inspired by the Transformers. The solar panel is such as the head of a transformer, the middle sensing part is the body, and the lamp on both sides is the hands. The spotlight of the lens is designed as the bullet at the end of the robot's hands, and a variety of adjustment methods are as flexible as the joints of a robot.

Design Idea: The tough design concept comes from the polygon, and the light range can reach 30 meters. Both the solar panel and the lamp can be adjusted 360 degrees. It's as flexible as a leopard.

Carton Size 550*470*410mm/21.65*18.5*16.14in	

Design Idea: The tough design concept comes from the polygon, and the light range can reach 30 meters. Both the solar panel and the lamp can be adjusted 360 degrees. It's as flexible as a leopard.

Design Idea: Through a tough and rigid stroke color, we outlined the shape of the robot. The large luminous area makes the product brighter, the irradiation area more extensive, and the visual impulse more ferocious like a wolf with great impact.

Design Idea: Inspired by the image of ancient Chinese windows, the use of symmetrical graphics perfectly shows the soft Chinese beauty. If it is installed on the wall, it can nicely add a quiet, soft, and graceful texture to the air.

Design Idea: The ancient window shape is the design element, and the black tone is used to enhance the retro style.

Design Idea: Inspired by elements of the baby face. The soft black edges at both ends are the doll's hair, and the glowing surface in the middle is the doll's face, which fills the yard with an innocent and lovely atmosphere.

Design Idea: Inspired by the ice cube hanging on the tree branches, crystal clear and icy. Under the shining light, it shows the transparent and full luster, highlighting the high-end and simple fashion.

Design Idea: The inspiration for the design is from undulating peaks covered with ice, and the multiple prisms form the nobility of diamonds under sunlight or light. It is available for a variety of DIY assembling methods.

Design Idea: Inspired by the shape of the smiling face, the transparent mask is the shape of the mouth, and when the lamp is lit, the combination of the lamp beads and the reflective cup reveals the shape of the teeth. When the lights are on at night, it creates the warm effect of smiling happily.
